SOURCING

We can function as a sourcing agent of the buyer.
We source and choose the best China suppliers that precisely meet your needs.
We make buyers to gain a competitive edge and increase their bottom line with minimum investment and risk.
We have been helping thousands of worldwide customers successfully find qualified suppliers in China.

We can help you:

- [Find suppliers who can supply you with a certain product that they are producing]
- [Find suppliers who can realize your blue print that you need to launch a new product according to]

We have multiplex sourcing channels in running:

- [Mega Suppliers Database]
- [Suppliers Magazines]
- [Search Engines]
- [Corporate Customs Database]
- [Trade Show Entries]
- [B2B Portals]
- [Yellow Pages]
- [Other Subsystems]

FACTORY AUDIT

Features

A Factory Audit can uncover problems before production. Through factory audit, you could have an exact understanding of your supplier's capabilities, systems, management, and operating procedures.

Benefits

Factory Audit enables you to select a qualified supplier with confidence.

Checks

- [Factory profile]
- [Organization / Workflow]
- [Production Lines / Capacity]
- [Facilities / Machinery]
- [Quality System]
- [Technical Capability]
- [Procurement / Supply]
- [Hygiene / Security]
- [Environment]

Note:

Other than the above check list, we may carry out tailor-made plan according to your request. A comprehensive & detailed on-site report with photographic evidence is provided within 18 hours after the Factory Audit, detailing the Auditough's on-site findings and results.

SAMPLE REVIEW

Features

A Sample Review is performed when you have a requirement of samples from your supplier. Samples are directly sent to our test room from your supplier. Samples are tested according to your instructed criteria. Through sample check, you could have an exact & quick understanding of the quality of the samples; furthermore, samples have to be recollected & rechecked until you approve their quality.

Benefits

Sample Review enables the items you would order for mass production meet your standards in shortest possible time.

Checks

VISUAL

- [Appearance & Workmanship]
- [Artworks]
- [Packaging]

MEASURE

- [Dimension]
- [Weight]

TEST

- [Performance]

Note:

Other than the above check list, we may carry out tailor-made plan according to your request. A comprehensive & detailed on-site report with photographic evidence is provided within 18 hours after the Factory Audit, detailing the Auditough's on-site findings and results.

FINAL INSPECTION

Features

A Final Full Inspection:

A Final Full Inspection is performed when production is 100% complete and ready for delivery from the factory or warehouse. Products are 100% inspected.

Final Random Inspection:

A Final Random Inspection is performed when production is at least 80% complete and ready for delivery from the factory or warehouse. Samples are randomly selected according to AQL sampling plans.

Through Final Inspection, you could have an exact understanding of your goods at your supplier.

Benefits

Final Inspection enables the final goods you ordered comply with your standards.
